Hyderabad, Telangana - 500059, India

OBJECTIVE

B.Tech graduate in Computer Science and Engineering with strong programming skills in Java and Python. Passionate about solving real-world problems using data structures and algorithms. Seeking a Software Development role to contribute effectively to challenging projects and grow as a developer.

EDUCATION

- **GuruNanak Institute of Technology** November 2021 - June 2025
B.Tech-CSE Hyderabad, India
 - CGPA: 8.78/10
- **Junior College** March 2021
Intermediate-MPC Hyderabad, India
 - Grade: 97.8%
- **School Name** March 2019
Secondary Education Hyderabad, India
 - CGPA: 9.5/10

PROJECTS

- **NETFLIX CLONE** June 2024
Tools: [HTML, CSS] 
 - This project is a static Netflix clone created using HTML and CSS. It is a simple, yet effective, recreation of the Netflix user interface, showcasing the use of modern web design techniques and responsive layouts. The clone includes elements such as a navigation bar, movie banners, and a grid of movies, designed to replicate the look and feel of the actual Netflix platform.
- **SIMON GAME** Nov 2024
Tools: [HTML, CSS, JS] 
 - Simon Game, a responsive, interactive web application inspired by the classic memory game. Built with HTML, CSS, and JavaScript, the game challenges users to follow increasingly complex color sequences, enhancing their memory and focus. The game tracks user progress, updates the level after each successful sequence, and resets after any error, providing a real-time display of high scores and engaging feedback.
- **TASK MANAGER** June 2025
Tools: [Java, Spring Boot, HTML, CSS, JavaScript, SQL] 
 - Task Manager is a full-stack web application designed to help users efficiently create, organize, and manage tasks with ease. Built using Java and Spring Boot on the backend and a responsive frontend using HTML, CSS, and JavaScript, the app features secure user authentication, dynamic task creation, categorization, priority levels, deadline tracking, and file attachments. The dashboard provides a visual summary of total tasks, pending items, and upcoming deadlines. Users can add, edit, filter, and manage tasks with real-time status updates and intuitive UX design for improved productivity.

SKILLS

- **Programming Languages:** C, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript
- **CS Fundamentals:** OOPS, DSA, OS, DBMS, Computer Networks
- **Frameworks/Tools:** Git, MySQL

CERTIFICATIONS

- **Intrainz Internship in Java** Nov 2023 - Jan 2024
- **Salesforce Developer Virtual Internship** May 2024 - June 2024
- **Wipro TalentNext Java Full Stack** May 2024 - Sep 2024

TRAINING(S) UNDERGONE

- Undergone JAVA Full Stack Development Training conducted by Wipro.
- Attended PPT training provided by GNI.
